## PROFESSIONAL SUMMARY

Frontend-focused IT undergraduate (B.Tech, 2028) with hands-on experience building React.js web apps and Firebase-backed platforms. Completed a software internship applying WCAG accessibility and agile practices. Seeking a web or full-stack development internship to contribute to real products and grow backend expertise.

## EDUCATION

**B.Tech — Information Technology** | Kumaraguru College of Technology

Aug 2024 – May 2028

CGPA: 8.2

**Higher Secondary (12th): 96% | Secondary (10th): 97%** | Bharathiya Vidhya Mandhir Matric Hr. Sec. School, Pollachi

## TECHNICAL SKILLS

**Languages:** Python | JavaScript | SQL | Java   **Frontend:** HTML5 | CSS3 | React.js | Responsive Web Design | UI/UX Principles

**Backend / DB:** Firebase (Auth + Firestore) | MySQL | DBMS   **Tools:** Git | GitHub | VS Code | Canva | Adobe Premiere Pro

## INTERNSHIP

**Software Project Intern** | Kaumaram Prashanthi Academy

Jun 2025

**Tech Stack:** HTML5 | CSS3 | JavaScript

- Conducted user research with specially-abled students to identify communication barriers; translated findings directly into UX design decisions.
- Built an accessibility-focused web app applying WCAG inclusive design principles across the full development lifecycle — from requirements to testing.
- Collaborated in a cross-functional agile team across requirement gathering, iterative development, and testing.

## PROJECTS

**Fake Job Detector** — Job Posting Authenticity Web App [\[GitHub\]](#)

**Tech Stack:** Python | React.js | HTML5 | CSS3 | JavaScript

- Built a classification model on job posting data to detect fraudulent listings; evaluated performance using precision, recall, and F1-score metrics.
- Developed a fully responsive React.js frontend that accepts job posting text and displays real-time authenticity predictions with confidence scores.

**NeuroBridge** — AI-Powered Inclusive Education Platform [\[GitHub\]](#)

**Tech Stack:** React.js | Firebase (Auth + Firestore) | HTML5 | CSS3 | JavaScript

- Built a React.js + Firebase platform for children with special needs featuring early screening tools, AI chatbot, progress tracking, and caregiver collaboration via role-specific dashboards.
- Implemented Firebase Auth and Firestore for real-time data sync, automated milestone reminders, and secure role-based access across caregiver, teacher, and admin views.

**Well-Being** — Crowdfunding & Community Infrastructure Platform [\[GitHub\]](#)

**Tech Stack:** React.js | HTML5 | CSS3 | JavaScript | GitHub

- Developed a React-based civic platform where citizens apply for public facility projects, donate to active campaigns, and track funding milestones through an interactive dashboard with secure login.
- Implemented role-based access control, responsive UI across device sizes, and collaborative version control via GitHub with structured branching.

**Smart Parking System** — DBMS-Driven Reservation Platform [\[GitHub\]](#)

**Tech Stack:** SQL | DBMS | HTML5 | CSS3 | JavaScript

- Designed a normalized relational schema (3NF) to manage slot inventory and reservations; implemented real-time color-coded availability updates via SQL queries.
- Built a complete frontend interface with dynamic slot status rendering and automated reservation workflows integrated with the database layer.

## CERTIFICATIONS & COURSES

**Responsive Web Design Certification** — freeCodeCamp

**Front End Development Libraries Certification** — freeCodeCamp

## ADDITIONAL

**Languages Spoken:** English | Tamil | Telugu | Malayalam | Hindi (Basic)

**Interests:** Technical event participation | Cinematography & Video Production | Real-world problem solving
